

## Limited Production Commitment

At Boy Wonder we recognise that we all have to live within planetary boundaries as the earth cannot sustain infinite growth. As a sustainable brand we embrace the idea of sufficiency and sustainable prosperity and eschew the high growth and high profit paradigm. This entails being able to provide ourselves and the people in our supply chain a decent living wage, being able to donate to our charity partners and being able to invest back into the business rather than paying dividends and shareholders.

Therefore, at Boy Wonder Ltd. we formally commit to limiting our production to 5000 garments per annum. These units will be made in small batches to minimise waste or made to order where possible. This commitment will be reviewed annually and increases can be made to the total garment limit under careful consideration to take into account for rising costs or to cover taking on extra staff. Garment production limits will not be increased to make more profit. Any increase to the production limit must be agreed upon formally by all company directors. We believe we are the first company in the world to make such a commitment and hope others will follow our example
