

SIMPLE GUIDE TO JERSEY CARE

Looking after your Boy Wonder garment

1

TREAT STAINS

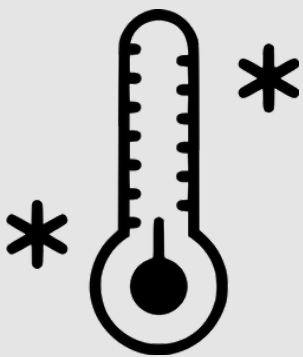

Soak stains in cold water straight away and treat with stain remover if necessary on the underside, DO NOT rub at the print. Spot treat dirt marks to reduce the need for extra washing. DO NOT Iron over stains as they will set.

2

WASH INSIDE OUT

Keep your print and it's colour bright and crisp by washing only when necessary and by turning the garment inside out.

3

WASH LOW

Washing at a low temperature is not only better for the planet but is better for your garment too. Also avoid high speeds and strong detergents.

4

LINE DRY

Avoid tumble drying as it damages fabrics and shortens the life of your garment. Line dry inside out to prevent harsh sunlight fading the print.

5

IRON INSIDE OUT

Hanging your garment in your bathroom when having a shower or a bath will allow the steam to help drop out any creases. Iron as little as possible to lengthen the garment life and avoid ironing on the print by turning it inside out.

6

REPAIR

If over time you get an area that needs fixing then use one of our repair kits or iron-on patches to fix it up. Love your clothes and pass them on.
